

ELEVATE YOUR PLAY.

WHY CAN'T YOU JUST PUSH A BUTTON TO RAISE YOUR KEYBOARD?

After asking this question, we rose to the occasion and did it ourselves.

Introducing the patented FREEDOM™ Keyboard Stand by SOLIDSTAND™ – the first of its kind that adjusts without removing the keyboard! By the simple touch of a foot pedal, you now have the freedom to smoothly adjust the height of your keyboard while playing from a standing or a sitting position.

Tired of the guess work when adjusting your keyboard? Sick of notches in the wrong place? Hate lugging it on and off the stand?

Elevate to the next level with FREEDOM.™

SOLIDSTAND™ Foot Pedal

◀ Your mic and music stand can move with you. Optional accessories allow the use of a music stand, a microphone boom stand, and other mountables that will adjust with the keyboard.
